I would like to change our way of using petroleum. We use a lot of oil to make plastic products, move vehicles and burn waste. These activities cause pollution of oceans and air; our environment never ceases to get worse. In fact, we don't need so much plastic and there are too many vehicles in the world. People are only accustomed to this terrible situation. In order to recover the clean environment, people's way of thinking must be changed. If I were given great power, I would change our school curriculum so as to teach children the importance of natural environment and train them to do with as little as possible and content themselves with their life.

講評

長文 4 題, 自由英作 1 題で, 例年通り, 長文で同義表現, 内容判断, 英文挿入などの設問も例年通り。英文は全体として昨年よりは若干読み易かったかもしれないが, 時間内にある程度まとまった量の英作文をするのは至難の業である。
