問 2

(1) 1 (2) 3 (3) 3 (4) 2 (5) 1

V

One invention that I want to prevent is a motorbike. A motorbike is a very dangerous vehicle not only for riders but also for pedestrians and car drivers. For bicycles there are special lanes for cyclists, so that they can run fairly safely on the road, while motorbikes should run on the same lanes as cars. Sometimes riders run very irregularly to pass between cars, which annoys car drivers and may cause a traffic accident. Riders may turn sharp at the corner of a narrow road, which is dangerous for pedestrians; pedestrians may be hit by motorbikes and get seriously injured. Motorbikes are rather small compared with cars and trucks, so if there is a crash accident, probably almost always riders have much more serious injuries than drivers and may lose their life. For these reasons I want there to be no motorbike in our society.

講評：問題形式は例年通りだが，長文の内容は分かり易く，設問の難易度もやや易しめだった。とはいえ，英文の全体量が多いので，英作文まできっちり書くのはかなり大変だっただろう。また英作文の課題もそれほど書き易いものではないので，日頃どれだけ練習していたかで差がついたのではないかと思う。
